

Sustainable Transportation

With the rapid continuing development, the universal population growth as well as climate changes while still depending on Car for transport between countries in the following ٣٠ years. All the aforementioned facts increase the challenges facing the world's countries. So the countries that choose to do brave procedures in promoting and diversity the special urban transportation systems will gain the competitive advantage. The Countries' investment in their future by enhancing sustainable transportation will promote production, attraction and the life's comprehensive quality.

Higher education isn't apart from achieving sustainable development according to the goals set by the United Nations which were adopted by the world's leaders in September ٢٠١٥ during a historic nation's summit.

Based on Egypt vision ٢٠٣٠, Aswan university is committed to encouraging and developing sustainable transportation from and into the Campus, changing the culture of daily transportation for the academic staff, their assistants and the employees, promoting their health and physical fitness and motivating them for active transportation instead of relying on the fuel-consuming and environment- polluting mechanical means of transportation.

So the university set a strategy for the project" Bicycle for Every Students" which was launched by the ministry of higher education among its plans for sustainable transportation. This strategy aims at supporting better and cleaner social and environmental atmosphere.

Suitable number of bicycles will be provided in the Egyptian universities to cover the majority of students, academic staff, their assistants and employees. Bicycle shall be the mean of transport inside and outside the universities.

Aims:

- Enhancing walking from and into the Campus according to the distance. For example; from and into the complex of the faculties of education and specific education and the complex of the faculties of engineering and commerce.
- Prompting using the university buses.
- Providing special paths for motor cycles which cover all the university's places as an environment-friendly means of transport or for doing sport. For example, Sahary and Aswan Al Jadedda Campuses.
- Providing suitable parking areas.
- Providing maintenance units.
- Organizing monthly festivals in the university.
- Taking part in a festival at the level of universities every semester.

The first stage “٢٠٢٥” targets ٥٠% of the academic staff and ٥٠% employees besides a ration of the university students.

Schedule

Schedule is set according to the largest number of users and the daily use percentage.

This strategy is prepared by Aswan University International Ranking Office.
